

## ATS Management software TITAN (Multilingual CD-ROM edition)

## ATS8100

### ATS Programming tool

TITAN provides a simple, open look Windows® interface that simplifies the programming of all the Advisor MASTER options.

A PC running TITAN can be connected to a control panel either remotely via the built-in PSTN dialer or locally via RS232.

The RS232 connection is timed when using the on board RS232 port or permanent when using the optional ATS1801 Computer & Printer interface. Used in either mode, Titan is capable of up and downloading the entire database at once or settings by settings.

A powerful report printing facility produces detailed programming sheets for all system information contained within the TITAN database. This feature enables quick reference for trouble shooting, expansion, programming and client administration. It also features a range of flexible history reports.

### Specifications

#### Computer Requirements

	Windows 95/98, NT, 2000 or XP
	Pentium 166 or higher
	32 MB of RAM
	100 MB of free hard drive space
	CD-ROM player and mouse
Max. number of PC with TITAN connected	1 (TITAN is a single user software)
Max. number of panels sim. in operation	4 x 16
Max. number of panels in database	9999 systems x 1024 panels/system
Max. number of printers	Dependant on the number of ports & allocation of those ports
Communication ports on computer:	Com 1, Com 2, Com 3, Com 4
Spec. cable with ATS1801	4 core shielded data cable RS232 (not twisted pair)
Spec. cable with on board RS232 port	ATS1630 active RS232 cable
Maximum cabling distance on RS232	15 m
Port A of the interface (computer)	Serial RS232, Tx, Rx, CTS, RTS, GND
Port B of the interface (printer)	Serial RS232, Tx, CTS, GND

### Ordering Information
