

FA260*Intelligent xenon beacon, red*

These FA260 range of intelligent beacons overcome the problems of high current pulses associated with conventional xenon tubes. The units have surge current suppression that eliminates the need for heavy duty power supplies.

The unit is supplied with a shallow base and with a choice of lens colours and bases. VDS approved units are also available.

A 230V mains powered unit is available with red or yellow lens and the deep base.

These units provide a high lash energy for excellent power performance.

The DC versions are IP54 rated and the mains powered units are IP65.

***Standard Features***

- **No switch-on current surge**
- **Surge current suppression**
- **24V, 2W operation**
- **Choice of lense colours and bases**
- **VDS approved versions available**

FA260

Intelligent xenon beacon, red

Specifications

Operation	continuous
Voltage range	20-30 Vdc
Mains unit	230 Vac
Average current consumption	90 mA @ 24 Vdc
Mains unit	12 mA
Power rating	2,1 W
Mains unit	2,9 W
Flash rate	60 / min
Flash energy	1,35 joule
Mains unit	2,0 joule
Operating temperature	-20 to +55 °C
IP rating	IP54
Mains unit	IP65
Dimensions	93mm x 72mm
Mains unit	93mm x 100 mm
Weight	210 g

Ordering Information

Part No.	Description
FA260	Intelligent xenon beacon, red
FA260VDS	Intelligent xenon beacon, red, VdS approved
FA260Y	Intelligent xenon beacon, yellow
FA260YVDS	Intelligent xenon beacon, yellow, VdS approved
FA260B	Intelligent xenon beacon, blue
FA260C	Intelligent xenon beacon, clear
FA260G	Intelligent xenon beacon, green
FA260M	Intelligent xenon beacon, mains powered, red
FA260MY	Intelligent xenon beacon, mains powered, yellow
FA260MG	Intelligent xenon beacon, mains powered, green
FA260W	Intelligent xenon beacon, red lens, white base
FA260WY	Intelligent xenon beacon, yellow lens, white base
FA260WB	Intelligent xenon beacon, blue lens, white base
FA260WC	Intelligent xenon beacon, clear lens, white base
FA260WG	Intelligent xenon beacon, green lens, white base
