

## **EV100**

*PIR Detector with 5 Curtains of 10 m, NC Relay*

### **EV 100 Series**

The EV 100 Series has been designed specifically for Residential/short range Commercial applications. Details such as the plug-in electronics allow rapid wiring while the Gliding Focus Curtains ensure that you have simple commissioning with perfect detection every time, without the need for time consuming alignment. The EV 100 series enables rapid installation, provides sharp detection every time while guaranteeing excellent false alarm immunity with the highest quality.

### **Volumetric Curtains of Detection**

Benefitting from the success of the EV series PIRs, the EV 100 also features solid curtains of detection. Full undercraw protection gives maximum security while the special characteristics of a "curtain" ensures not only better intruder detection but also better PIR stability from the environment.

### **"4D" Signal processing**

4D signal processing is the latest generation of PIR processing taken from the EV 400 Plus. 4D allows the PIR processing to intelligently analyse a signal pattern and distinguish between real human movement and false alarm hazards. The PIR processing is resistant to false alarms by analysing the size, shape and speed of successive signals.

### **True Range Control**

The EV 100 series is able to adjust the PIR range. Due to the strength of the Gliding Focus Curtain Mirror, it is possible to reduce how hard the detector is working in smaller rooms, making the detector even more stable, without compromising it's excellent detection.

### **Accessory**

A wall and ceiling mount bracket is available providing flexibility to install and aim the detector where required.

### **Pet immune EV 100PI**

The EV 100PI has been specifically designed for applications where the user wishes to allow pets to move around the protected area, while the system is armed. By combining custom designed mirror optics with an exclusive ASIC, the EV 100PI provides peace of mind that property is perfectly protected without the worry of false alarms through any household pets. The EV 100PI is designed to be immune for pets up to 20 kg, however larger pets can be allowed for through alternative methods of mounting the detector (see application notes).

### **Standard Features**

- **10 m coverage - 5 curtains**
- **Plug-in electronics simplifies installation**
- **Precision "Gliding Focus Curtain" mirrors**
- **Sealed optics**
- **Uses the latest generation "4D" signal processing**
- **Standard 4D / bi-curtain processing**
- **Low current draw**

# EV100

PIR Detector with 5 Curtains of 10 m, NC Relay

## Specifications

|                               |  |
|-------------------------------|--|
| <b>Supply voltage</b>         | 8 - 15 VDC                             |
|                               | Max. ripple 2 V peak-to-peak at 12 VDC |
| <b>Current consumption</b>    |  |
| Normal operation              | 5 mA                                   |
| In alarm, LED on              | 10 mA                                  |
| <b>Outputs</b>                |  |
| Alarm                         | NC contact, rated 100 mA at 28 VDC     |
| Tamper                        | NC contact, rated 100 mA at 28 VDC     |
| <b>Mounting height</b>        | 1.8 to 3.0 m                           |
| <b>Coverage</b>               | 5 curtains of 10 m range               |
| <b>Field of view</b>          | 86°                                    |
| <b>Ambient conditions</b>     | -10 °C to +55 °C; Max. 90% humidity    |
| <b>IP/IK rating</b>           | IP301                                  |
| <b>Dimensions (W x H x D)</b> | 52 x 99 x 47 mm                        |

## Ordering Information

| Part No. | Description   |
|----------|---|
| EV100    | 10m volumetric PIR motion sensor  |
| EV100PI  | As per EV100, but pet immune up to 20 kg  |
| SB01     | Wall/ceiling mount bracket ( $\pm 45^\circ$ horizontal, $0^\circ$ or $-5^\circ$ vertical) |
