

NC785

RS485 expansion kit for KSA701/FP1500 fire panels

General

The NC785 RS485 expander allows for an easy upgrade to the KSA701/FP1500 series addressable fire panels. Each module adds an additional industry standard RS485 communication port to the panel. This port could be used for communications with other network nodes in the fire panel network.

**Standard Features**

- **Industry standard RS485 communications**
- **No hardware configuration required**

NC785

RS485 expansion kit for KSA701/FP1500 fire panels

Specifications
